

name = "light"

argument

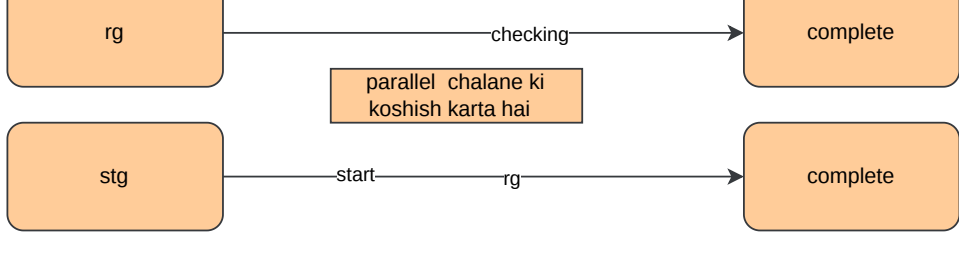

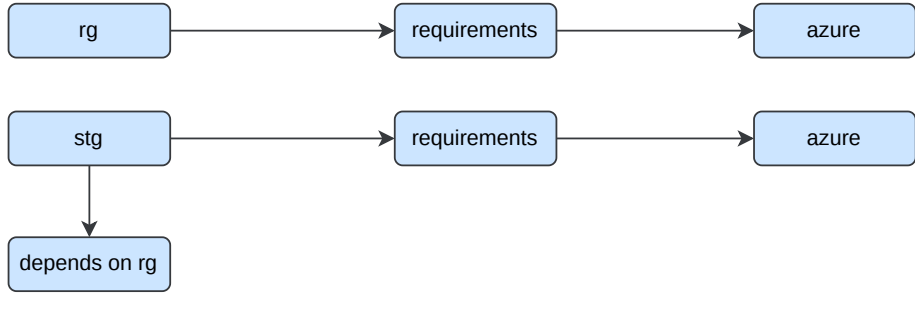

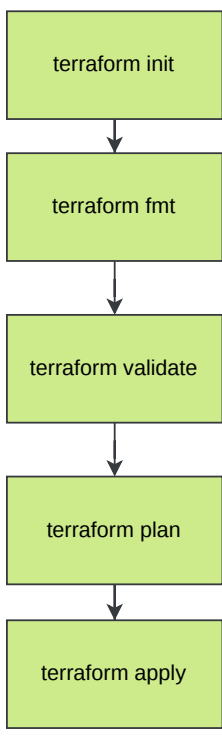

"light"

string ek value hai jisko double quote me likhte hai

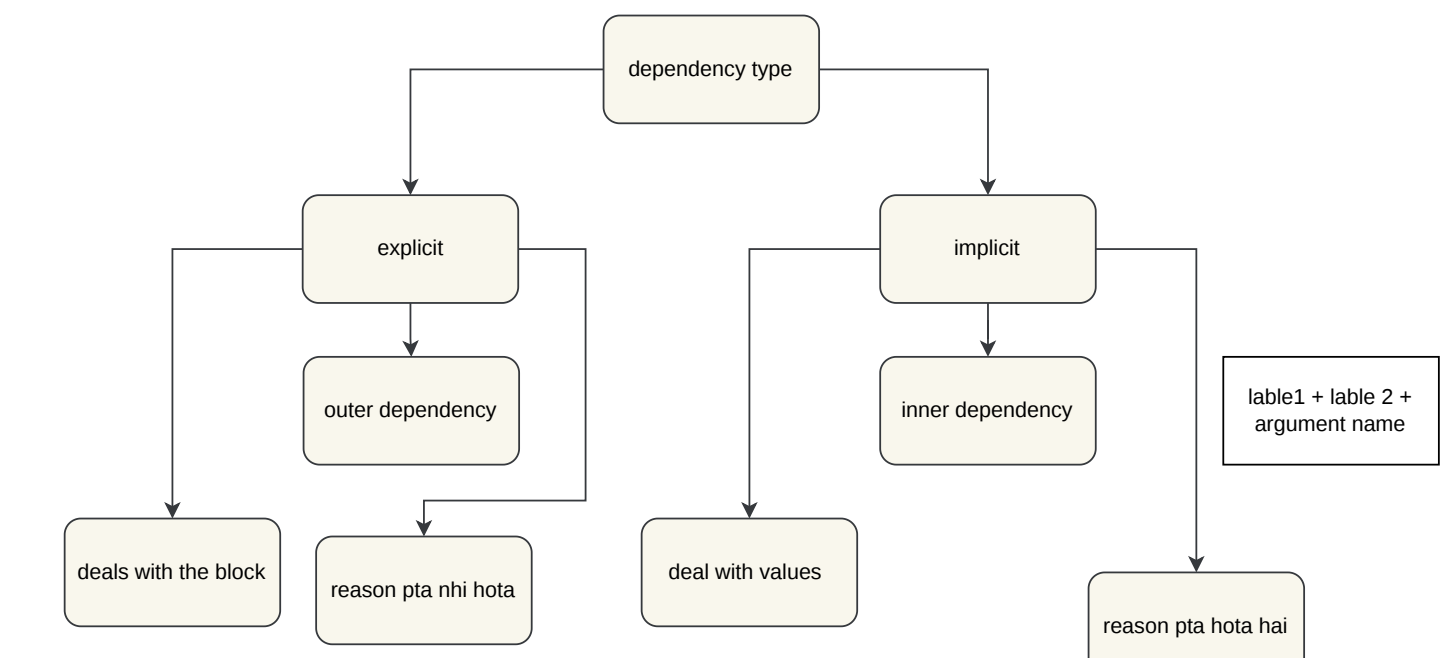

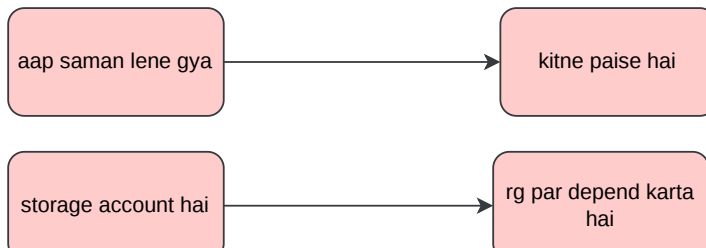

terraform destroy

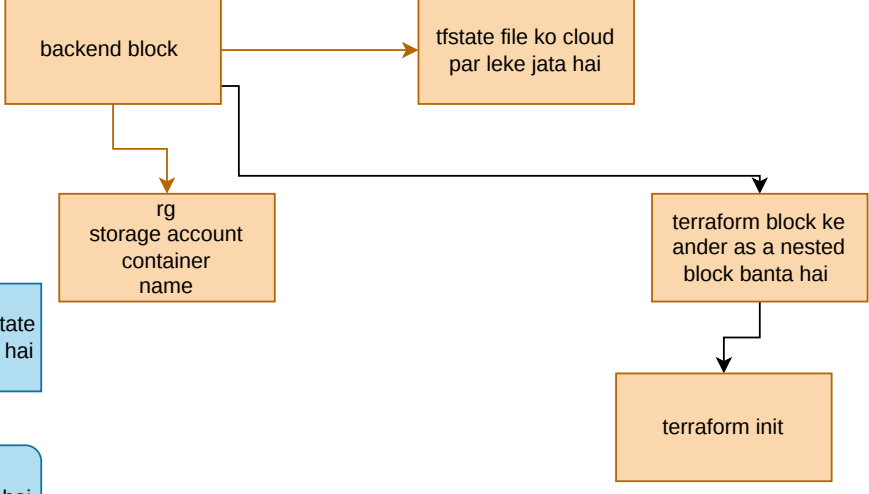

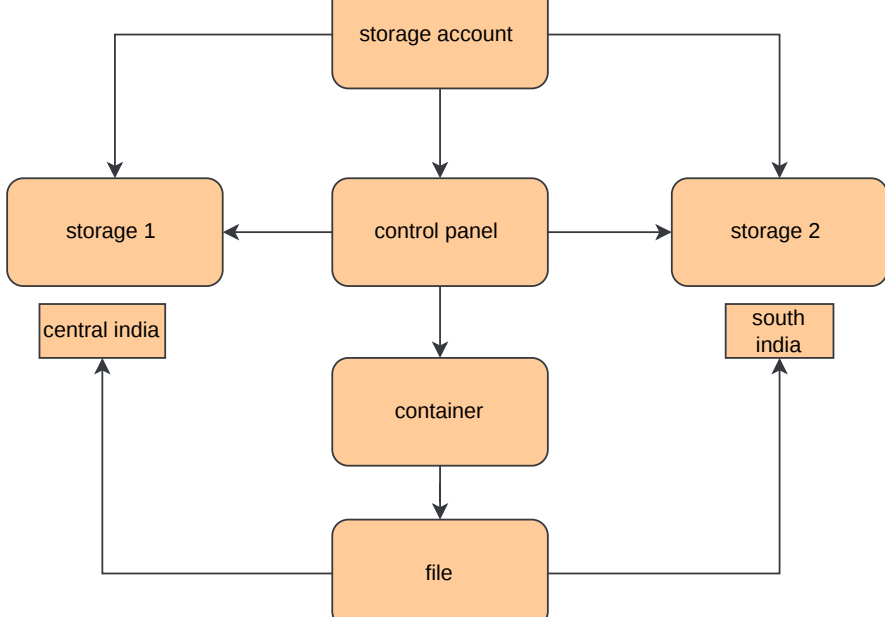

to delete everything that you created from terraform

what is dependency

```
resource "azurerm_resource_group" "rg" {
  name     = "light"
  location = "central india"
}
```

puri team ek hi tfstate se kaam kar sakti hai

tf state lock karta hai

```
terraform {
  backend "azurerm" {
    resource_group_name = "light"
    storage_account_name = "glasssofdevil"
    container_name = "itachi"
    key = "naruto"
  }
}

provider "azurerm" {
  features {}
}

resource "azurerm_resource_group" "rg" {
  name     = "light"
  location = "central india"
}

resource "azurerm_storage_account" "stg" {
  name                = "glasssofdevil"
  location             = "central india"
  resource_group_name = azurerm_resource_group.rg.name
  account_tier         = "Standard"
  account_replication_type = "LRS"
}

resource "azurerm_storage_container" "cn" {
  name                  = "itachi"
  storage_account_id    = azurerm_storage_account.stg.id
  container_access_type = "private"
}
```
